

## Dreamline Yachts: The fourth Dreamline 26 took the sea

*FANO, Italy:* Dreamline Yachts Shipyard has launched the latest unit of Dreamline 26, just two months after a recent launch of Dreamline 26 number 3.

The new Dreamline 26 is the fifth yacht built by Italian Shipyard in less than two years since the World Premiere of Dreamline Yachts at Cannes Boat Show 2014. It is the fourth unit in a successful range of yachts, which emphasizes all the innovations developed and introduced by the shipyard. Safety, comfort, unique performance and seaworthiness are due to the double nature of Dreamline 26, combining features of a navetta and a fast motor yacht in the same time. Extremely spacious interiors and life on board solutions are also a part of this successful model.

The latest Dreamline 26 “AKIRA” is equipped with two MAN engines of 1,900 HP each and with a pack of lithium batteries, that allows to satisfy all the electrical requirements on board, including air conditioning, without the need to start the generators for 8 hours. The whole electrical system is electronically regulated, being able to adapt for both 220 V or 380 V dock power.

# DL YACHTS DREAMLINE

Among the stylistic and functional innovations introduced on the Dreamline 26 "AKIRA", the most impressive are: the folding terrace with a transparent sliding door on the starboard side, a totally new designed custom furniture, the presence of a "wine cooler" with two temperature zones in the main salon, the crew area completely rebuilt with two cabins, four beds, two bathrooms and dinette / relaxation area.

Another elegant element introduced on the Dreamline 26 "AKIRA" is a transparent round Jacuzzi on the flybridge, surrounded by a large sunbathing area. The private to the owner outdoor area on the bow of the yacht benefits of a new bimini top solution, making this zone even more cozy during the hot summer days.

The yacht was built in accordance with the regulations of RINA Green Class and RINA Comfort Class.

Paolo Bencivenni, CEO of Dreamline Yachts, says: "Even this launch demonstrates the ability of Dreamline Yachts to make continual progress, by introducing innovative elements to each consecutive unit. We are very proud of the work done so far. The results achieved led us to make new investments in order to optimize and improve our production standards. The Dreamline 26 yacht model brought to us a great satisfaction, and this launch is another proof of it."

## **About Dreamline Yachts**

*Dreamline Yachts is an Italian Shipyard that manufactures a fully customized family of yachts in aluminium or fibreglass. The model range consists so far of a well-known Dreamline 26, Dreamline 30, Dreamline 34, Dreamline 40, Dreamline 46 and a Dreamline 49.
